

— ESTABLISHED 2020

Company Profile

We build software that scales, stays secure, and holds under load. Since 2020 the standard hasn't moved: every brief gets executed the way it was written, and every client sees exactly what we're doing and why.

Mission

You hand us the problem. We solve it with technology that fits how you actually run, not how a pitch deck says you should.

Vision

Same standard whether we're delivering for **ten clients or two hundred**: the brief ships as written.

Our Values

How We Work

Collaboration

One team across engineering, delivery, and strategy. Fewer handoffs, fewer approvals, faster changes of direction.

Excellence

Work is checked against the brief, not against how it felt. If it misses the spec, it doesn't ship.

Harmony

A small team that gets on changes direction without friction. We treat that as a delivery advantage, not an HR line.

Integrity

You see what's done, what isn't, and why. That's how we report, and it's how we bill.

OUR LEADERSHIP

The people accountable for the work

Ebrahim Tiwana

Founder & CEO Deliverydevs

Experience 14 Years
Qualification PhD Scholar, Computer Science (expected 2026), MAJU
Specialization Leadership, Technology Strategy & Governance

Ahmed Faraz

Co-Founder & CTO

Experience 17 Years
Qualification Masters in Telecommunication, MAJU.
Specialization IoT, Telematics & Software Solutions

Basil Muqtadir

Co-Founder & CTO

Experience 14 Years
Qualification BS Accounting & Finance, London School of Economics, Certified FRM
Specialization Digital Transformation, Financial Planning & Investments

OUR CORE TEAM

The people who ship it

Absar Alvi

Head of Projects & Client Services

Experience

12 Years

DevOps engineers

SERVICES

What we do

01

Web Development

Developers, designers, and strategists who ship production web work. You get people who have built this before, not a team learning on your project.

03

DevOps

Accredited DevOps engineers who take you from strategy and assessment through to full implementation. Faster releases, fewer breakages, one team working in real time instead of passing tickets over a wall.

02

Cyber Security

We monitor, defend, and lock down your infrastructure. Network and information security, malware protection, and access control, plus Identity and Access Management (IAM), Threat Intelligence (SIEM), and Data Loss Prevention (DLP). Your data stays confidential and your systems stay reachable only by the people who should reach them.

04

Staff Augmentation

Skilled engineers who plug into your team when you need them and step out when you don't. Scale up or down without the cost and lag of full-time hiring. We source the fit; you keep control.

SOLUTIONS

What we build

SaaS Development

Subscription-based platforms built to scale with you. Always current, no heavy upfront build.

Application Modernization

We take legacy systems that still run your business and rebuild them for how the business runs now.

Project Management

Delays, budget overruns, and communication gaps are what kill software projects. We run delivery so yours isn't one of them.

IoT Solutions

Secure IoT from industrial deployments to smart cities and wearables. Real-time data, built to scale.

Machine Learning

Predictive analytics, image recognition, and NLP applied to decisions you actually make, not demos.

Mobile & Web App Development

Custom APIs for clean data exchange and integration across the systems you already run.

Mobile & Web App Development

Full builds for phones, tablets, and voice-assistant devices. One team, the whole stack.

Artificial Intelligence Solutions

Agentic AI that fits your existing infrastructure and clears enterprise bars for performance, security, and scale. Intelligent automation, NLP, computer vision, and full AI product builds, shipped production-ready.

SOLUTIONS

ERP Solutions

One connected system across finance, inventory, HR, and CRM. We design and implement it so your departments stop working off separate spreadsheets and start working off the same data.

Odoo

Official Odoo partners. Modular open-source ERP, shaped to how you actually operate.

ERPNext

We partner with ERPNext for cloud-based ERP. Scalable, cost-effective, and tailored to your business.

IOT SOLUTIONS

IoT that earns its keep

- ☐ Connect your tracking devices into one clean data flow.
- ☐ Optimize routes and automate the manual tasks.
- ☐ Catch delays and disruptions before they cost you.

IoT Hardware Expertise:

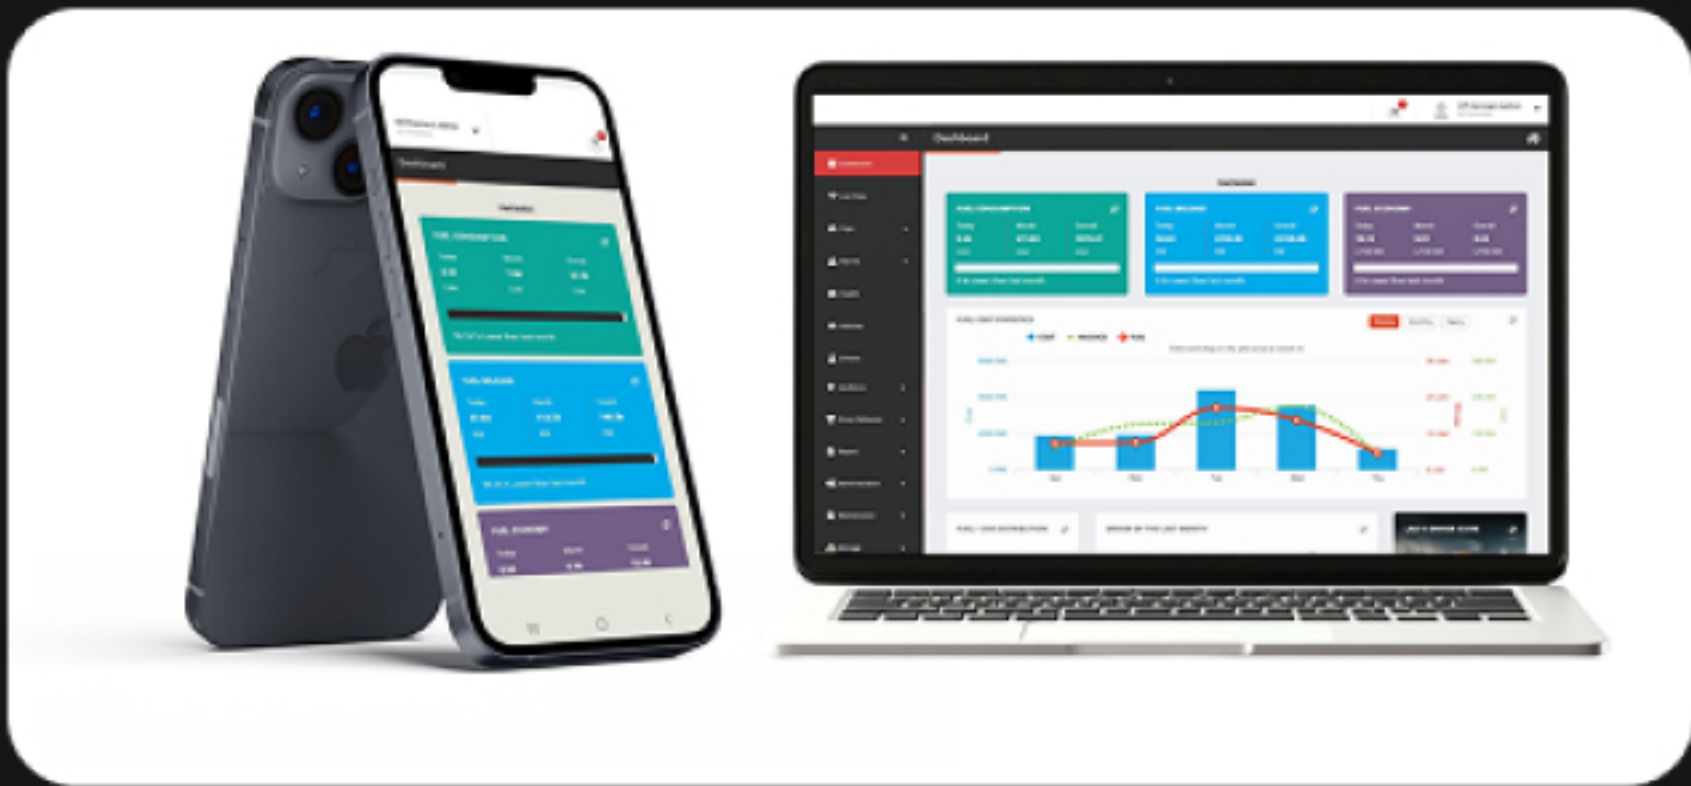

We spec the right hardware for you. GPS trackers, OBD devices, sensors. Selection, installation, and maintenance, all handled.

Telematics:

Vehicle data turned into fleet decisions. Better routes, monitored driver behaviour, lower fuel cost.

Why Choose Deliverydevs?

- ☐ 40+ years of combined team experience.
- ☐ End-to-end: custom hardware and software, not one or the other.
- ☐ Support that stays after launch.

What we built, year by year

2020 – 21

- First office established in Karachi
- First Project Delivered Successfully
- Software Engineering Department Established

2021 – 22

- ERP Department Established
- 50 Projects Delivered Successfully
- DevOps Department Established
- Completed Project Successfully for Power Cement

2022 – 23

- Got Registered as a Private Limited
- Official Partners for Frappe in Pakistan
- Completed Project Successfully for EFU
- Became a Member of P@sha & PSEB
- Exhibited at LEAP, Riyadh.
- Completed Project Successfully for Adamjee Insurance

2023 – 24

- 60% Increase in International Exports
- Conducted a Successful International Seed Funding Round
- Project Management & Marketing Departments Established
- Vurke Project Delivered Successfully
- Completed Project Successfully for TCF
- Exhibited at GITEX, Dubai

2024 – 25

- Became Official Partners for Odoo
- AI Department Established
- Deliverydevs LLC Established in Dubai, Managing Regional Delivery and Client Engagements
- Completed Project for Deployable AI – Dubai
- Arabic Translated Website Launched
- Completed Project for Deployable AI – Dubai
- CISA Certified Team
- 10x Revenue Achieved without a Sales Team
- Sponsored Odoo Roadshow '25 in Karachi
- Site Office Established in DHA Karachi
- Completed Project Successfully for Vlektra
- 70% Increase in International Exports
- Returned to GITEX, Dubai
- Strategic partnership with TSG
- Partnership with Wialon

Who we have delivered for

GLOBAL FOOTPRINT

Where we work

Four-plus years in, we deliver into these markets:

- | | |
|------------|----------|
| 📍 Pakistan | 📍 UAE |
| 📍 KSA | 📍 Oman |
| 📍 Bahrain | 📍 UK |
| 📍 Canada | 📍 Africa |

100+ active clients with an average relationship of over 4 years. And a 96% retention rate.
